

## United States History

### Political Systems

- \_\_\_\_\_ Interpret how geographic, economic, technological, and social forces have affected the politics of the United States. **USH-01**
- \_\_\_\_\_ Analyze political interactions between the United States and other countries within a global context. **USH-02**

### Economics

- \_\_\_\_\_ Examine the relationships between historical events and the economy of the United States. **USH-03**

### History

- \_\_\_\_\_ Apply methods of historical inquiry (pose questions, collect and analyze primary and secondary sources, make and support arguments with evidence, and report findings). **USH-04**
- \_\_\_\_\_ Analyze historic events within their context and evaluate how interpretations of those events changed over time. **USH-05**

### Geography

- \_\_\_\_\_ Interpret various geographic representations (e.g., maps, graphs, charts), including those that show the relationship between the United States and the world. **USH-06**

### Social Systems

- \_\_\_\_\_ Compare and contrast ways in which social systems are affected by political, economic, environmental, demographic, and technological changes. **USH-07**
- \_\_\_\_\_ Examine the evolution of the American identity through the eyes of different cultural groups (e.g., African Americans, immigrants, Native Americans, religious groups, role of women in society). **USH-08**
